

Danco Machine, founded in 1979, is one of the largest machine shops in Silicon Valley, with a reputation for quality machining with customers in medical, defense, aerospace, automotive and other industries. Danco Machine provides a broad process capability as a contract manufacturer, including Assembly, EDM, Welding, sheet metal and precision tolerance requirements and extreme precision are the industry norm.

We are currently seeking a high caliber, CNC Programmer to join our engineering team. The right candidate would be a tenured professional with more than 10 years full time programming experience. The candidate would be capable of complex programming for horizontal and vertical CNC mills. Other requirements for the position are as follows:

- 10 years minimum experience as a CNC Programmer, demonstrating increasing capabilities, with an aptitude for learning and constantly improving.
- Seven years minimum Mastercam specific experience is required. Mastercam X preferred, however would consider strong Mastercam 9 experience.
- Familiar with cutting a wide variety of materials including various exotic alloys, aluminum, steel, plastic, etc.
- The ability to design necessary tooling and fixturing. Manage all phases of a production order from start to finish.
- Work with scheduling and various levels of skilled operators and machinists to ensure quality components.
- Strong communication skills a must.
- Demonstrate strong mathematical and analytical skill set.

We provide a comprehensive benefits package, including:

- Medical Insurance
- Dental Insurance
- 401K
- Paid vacation and holidays

A considerable hiring bonus (over \$1,500) is available for the right candidate.

Salary is in the range of \$30 - \$38/hr depending on experience.

Also, overtime and occasional double time is available based on current workload.
